Was there a publicly available privacy policy at the time of analysis? No

Website Analysis

This website collected and sent the following data about users to third-party companies²:

To track the user | 1 ad tracker sent data about users to third-party companies

1 ad tracker sent users' data to **StatCounter** through the domain statcounter.com

To watch and record the user

Session recording was not detected on this site.

To capture what users type, before they hit send

Key logging was not detected on this site.

To find out who the user is

Canvas fingerprinting was not detected on this site.

To track the user across the internet | 3 cookies sent data about users to third-party companies

2 cookies sent users' data to **StatCounter** through the domain statcounter.com
1 cookie sent users' data to **Google** through the domain google.com

This website did not collect and send users' data through these tracking technologies:

Facebook Pixel³ | was not detected on this site.

Google Analytics' 'remarketing audiences' | was not detected on this site.

¹ Translation provided by Google Translate. See: Côte d'Ivoire, Ministère de l'Éducation Nationale, "Mon école à la maison," <https://web.archive.org/web/20210303154321/https://www.ecole-ci.online/> (accessed March 3, 2021)

² A technical analysis does not definitively determine the intent of any particular tracking technology, or how the collected data is used. For example, an EdTech product can include third-party tracking code that collects information that may be useful to monitor the product's performance and stability. The same data collected by the same third-party code may also be used for advertising or other marketing purposes.

³ Facebook rebranded itself to Meta in October 2021. This privacy profile refers to Facebook as both the platform and the parent company, for consistency across the timeline of Human Rights Watch's investigation.
