¹ Translation provided by Google Translate. See: DEEP, "DEEP," <https://account.deep.go.th/account/auth/login> (accessed March 22, 2021) See also: Royal Thai Embassy, Washington DC, "Education Ministry launches digital education platform," September 11, 2020, <https://thaiembdc.org/2020/09/11/education-ministry-launches-digital-education-platform/> (accessed March 22, 2021)

² A technical analysis does not definitively determine the intent of any particular tracking technology, or how the collected data is used. For example, an EdTech product can include third-party tracking code that collects information that may be useful to monitor the product's performance and stability. The same data collected by the same third-party code may also be used for advertising or other marketing purposes.

³ Facebook rebranded itself to Meta in October 2021. This privacy profile refers to Facebook as both the platform and the parent company, for consistency across the timeline of Human Rights Watch's investigation.
